The following party tools and dependencies where used.

Tool/Framework/Library	Reason for using
Bootstrap 4	it's easier to use for page layouts than using css through out
CSS	To style and assist my application where bootstrap cannot assist.
Jquery	I find it easier to use jquery to manipulate data and divs. And it's more accurate and dynamic than Javascript

The got my "borrowed help" from the websites below.

https://stackoverflow.com/ - cart calculations

Errors or codes I could not get right.

The tax calculation give me problems
